**PRINCE WILLIAM STREET - IMPROVEMENTS PROJECT - UPDATE**

Dear Prince William Street Residents:

The City of Manassas would like to update our residents on the Prince William Street Project. The project includes adding curb, gutter, sidewalk and bike lanes along the street as well as upgrades to water lines, sanitary sewer and storm sewer. The project limits are from Wellington Road to Grant Avenue.

Residents will continue to see work along Prince William Street. In addition, several upcoming construction activities are as follows:

- The remaining wooden light poles between Jefferson Street and Wellington Road will be removed in order for the contractor to install storm sewer structures. The new black aluminum light poles will be installed this spring. There will be a period of time without street lighting to accommodate construction phasing.
- The storm outfall from Prince William Street past Lincoln Avenue to Winters Branch is one of the next phases of work. This work includes clearing of some trees and vegetation to install a storm pipe system. The contractor will be utilizing easements to access these locations.
- The City of Manassas will reinstall the yellow temporary water line on approximately March 1st, weather dependent, to allow for completing construction of the new water main along Prince William Street between Wellington Road and Jefferson Street. Customers may notice brief announced water shut-offs during the switchover of waterlines.

The contractor's overall schedule is still showing project completion in July 2019. We will keep you and your neighbors updated about the schedule and status through the project website: [www.manassascity.org/pwstreet](http://www.manassascity.org/pwstreet). You can now opt in to updates on the project website through the City of Manassas's notify me list <https://www.manassascity.org/notifyme>. Please feel free to reach out to the City about any concerns or comments.

Thank you,

**CITY OF MANASSAS**
